

SYSPRO

Future-Proofs your ERP Investment

For Manufacturers and Distributors including:

Automotive Parts and Accessories • Electronics • Fabricated Metal • Food and Beverage • Industrial Machinery and Equipment • Packaging • Plastics and Rubber and Many More.

The Six Pain Points Most Commonly Associated with Safeguarding an ERP Investment

- Long-term continuity of the ERP supplier
- Specialist industry knowledge
- The ability to implement the solution
- The provision of post-implementation support, education and training
- The ability of the solution to overcome application erosion
- The capability of the software to incorporate game-changing technologies

And how SYSPRO is Uniquely Positioned to Mitigate them:

- **Long-term Continuity:** Established in 1978, SYSPRO is acknowledged as one of the longest standing independent developers and suppliers of ERP Software
- **Specialist Industry Knowledge:** With a sole focus on Manufacturing and Distribution, SYSPRO has 40 years of industry-specific ERP experience and expertise that you can use to your benefit
- **Proven Implementation Methodology:** Through pre-defined inputs, activities, and outputs, the SYSPRO IDEAL Implementation Methodology maintains project controls and governance throughout the Implementation
- **Global Support and Training:** We offer a number of **support services**, ranging from self-help, remote support, to on-site support. The customer portal offers access to a **knowledge base** and the **Learning Channel** provides access to a wide range of comprehensive courses
- **Game-Changing Technologies:** Whether adopting emerging disruptive technologies that add value or by improving current operational capabilities, SYSPRO can enable you to benefit from all the innovation that matters, and none that doesn't.

Benefit From:

- Industry frameworks that speed up implementation, minimize disruption and ultimately attain a faster return on investment
- Customizable best practices, tailorable to your unique requirements
- An implementation team that enables delivery of your ERP objectives
- A team of solution experts who are at your beck and call, wherever you are in the world
- Online resources and training geared to enable and empower you
- Technology excellence and innovations that are pertinent to your operations, drive efficiencies and enable differentiated competitiveness.
